## ASSIGNMENT OF PATENT RIGHTS

THIS ASSIGNMENT is made by Ceretek, LLC, a Delaware corporation having a principal place of business at 411 Route 17 South, Suite 310, Hasbrouck Heights, New Jersey 07604, Assignor, in favor of SRI International, a California not-for-profit public benefit corporation having a principal place of business at 333 Ravenswood Avenue, Menlo Park, California 94025, Assignee.

NOW THEREFORE, be it known that, for good and valuable consideration the receipt of which from assignee is hereby acknowledged, assignor has sold, assigned, transferred, and set over, and do hereby sell, assign, transfer, and set over unto the assignee, its lawful successors and assigns, the entire right, title, and interest in and to the patents and patent applications listed on Schedule A, attached hereto, including without limitation, all patents which may be granted on any of the aforesaid patent applications, the worldwide rights to the inventions described and claimed therein, and reissues, re-examinations, all divisions, and continuations, renewals, extensions and continuations-in-part therefor throughout the world, together with all rights under the International Convention for the Protection of Industrial Property and any similar treaties or agreements, the same to be held and enjoyed by assignee for its own use and benefit and the use and benefit of its successors, assigns, and legal representatives, as fully and entirely as the same would have been held and enjoyed by assignor had this Assignment not been made, together with all income, royalties, damages and payments resulting from or attributable to activity or conduct after the effective date of this Assignment, and the right to sue and collect for all future, present and past infringements thereof, together with all causes of action for any and all infringements which may have occurred prior to the execution of this Assignment and the right to receive and retain the proceeds relating to those infringements. Assignee shall have the right to obtain and hold in its name all patents, registrations and similar protection throughout the world which may be available in the parents and patent applications;

AND, assignor further covenants and agrees without further consideration to communicate with assignee, its successors and assigns, any facts known respecting the patents and patent applications listed on Schedule A and testify in any legal proceeding, sign all lawful papers when called upon to do so, execute and deliver all papers that may be necessary or desirable to perfect the title to the patents and patent applications listed on Schedule A in said assignee, its successors and assigns, execute all divisional, continuation, and reissue applications, make all rightful oaths and generally do everything possible to aid assignee, its successors and assigns, to obtain and enforce proper patent protection for the patents and patent applications listed on Schedule A in the United States, it being understood that any expense incident to the execution of such papers shall be borne by the assignee, its successors and assigns.

This Assignment includes the right, where such right can be legally exercised by assignee, in its own name, to apply for and obtain patents in countries foreign to the United States of America, including the full right to claim for any such patent applications the benefits of the International Convention for Protection of Industrial Property or similar agreements, as fully and entirely as assignor could have done if the patent applications listed in Schedule A had been filed in its name, and the entire interest in any patents which may be granted on any such applications in such foreign countries.

Assignor hereby authorizes and requests the Commissioner of Patents and Trademarks of the United States, and the appropriate officials in any other country, to issue any and all letters patent of the United States of America that may be granted upon any patent application or any reissues, divisions, continuations, renewals, extensions and continuations-in-part therefor covered by this Assignment to assignee, its successors and assigns.

Assignor hereby covenants and warrants that no other agreement has been or will be executed in conflict herewith.

IN WITNESS WHEREOF this Assignment has been duly executed by an authorized officer of assignor and is effective as of the date below written.
